

# KPD

KPD

- The piston seal type Aston Seals KPD is composed of:
- A dynamic seal element which assures exceptional high sealing performance. Two compact and small seal edges ensure perfect fluid control and concentrate the load against the dynamic surface. The cavity between the two external seal edges keeps a small quantity of fluid which reduces friction and wear. Side grooves ensure that pressure loads the energizing O-Ring in all work conditions
  - A standard size O-Ring with low permanent deformation as energizing component on the static side
  - High sealing performance at low pressure

- also
- Excellent wear-resistance
  - Space-saving construction
  - Can also work for single action
  - Extended service life
  - Simple groove design
  - Low cost solution
  - High resistance against extrusion
  - Good temperature resistance
  - Easy installation on a solid piston

## MATERIAL

	① <b>Type</b>	Polyurethane
	<b>Designation</b>	SEALPUR 97
	<b>Hardness</b>	97 °ShA
	② <b>Type</b>	Nitril Rubber NBR
	<b>Designation</b>	RUBSEAL 70
	<b>Hardness</b>	70 °ShA

## FIELD OF APPLICATION

**Fluids** Hydraulic oils (mineral oil based)  
For other fluids contact our technical department

## SURFACE ROUGHNESS

<b>Dynamic surface</b>	Ra ≤ 0.3 μm	Rt ≤ 2.5 μm
<b>Static surface</b>	Ra ≤ 1.6 μm	Rt ≤ 6.3 μm

## GAP DIMENSION "g"

The largest gap dimension appearing in operation on the non-pressurised side:

50 bar	1.20 mm	300 bar	0.25 mm
100 bar	0.80 mm	400 bar	0.17 mm
200 bar	0.40 mm		

NB: for the Gap calculation, it is necessary to consider the elastic deformation of metal elements under pressure loads.

## LEAD-IN CHAMFERS

d	Smin
less 100	5 mm
100÷200	7 mm
over 200	10 mm

To avoid damaging the sealing lips during installation, housing must have rounded chamfers. Sharp edges and burrs within the installation area of the seal must be removed.

The above data are maximum values, they may be maintained for short periods and can not be used at the same time simultaneously.
