SA

The function of the Aston Seals SA wiper ring is to prevent introduction of dust, dirt and foreign matter into the system.

This is achieved by a special wiper lip which produces a very effective cleaning action, prevents the development of scores, protects the guiding parts and extends the service life of the axial moving rod seals.

An external sealing lip on the outside diameter contacts the housing in order to prevent moisture entering the groove.

The internal ribs give stability and prevent twisting and sticking of the wiper in the groove.

The material used to produce this wiper is a polyurethane compound that ensures

excellent properties in case of dry run, an increased wear-resistance and an extended service life due to good resistance against ozone and radiation caused by weather conditions.

- External sealing lip for a real housing protection
- Extended service life
- Low cost solution
- Excellent wear-resistance
- Space-saving construction
- No close tolerances are necessary
- Easy installation without expensive auxiliaries

## MATERIAL

Type	Designation	Hardness
Polyurethane	SEALPUR 93	93 °ShA

## FIELD OF APPLICATION

**Fluids** Hydraulic oils (mineral oil based)  
For other fluids contact our technical department

## SURFACE ROUGHNESS

<b>Dynamic surface</b>	Suitable for rod seal system
<b>Static surface</b>	$R_a \leq 1.6 \mu\text{m}$ $R_t \leq 6.3 \mu\text{m}$

## LEAD-IN CHAMFERS

d	Smin
less 100	5 mm
100÷200	7 mm
over 200	10 mm

Any pressure loads on the back of the rings should be avoided.  
Sharp edges and burrs within the installation area must be removed.  
The above data are maximum values, they may be maintained for short periods and can not be used at the same time simultaneously.
